

Sapling Plantation drive

27 th September 2019 Sapling Plantation drive

To add to the enviable collection of medicinal plants thriving in the Herbal Garden of CARE, the faculty and students of Chettinad School of Pharmaceutical Sciences organized a sapling plantation drive on 27th September 2019 within the CARE campus. The purpose of this drive was to plant flowering medicinal plants which will be tended to by the students themselves, instilling in them a sense of responsibility and ownership while acquiring knowledge.
