

CHETTINAD HOSPITAL AND RESEARCH INSTITUTE

DEPARTMENT OF OTORHINOLARYNGOLOGY

EXHIBIT FOR NAAC INSPECTION – 2022

On behalf of the Department of Otorhinolaryngology, an exhibition was displayed for NAAC inspection- 2022. We had station that depicted the activities conducted in our department which included speciality clinics, audiometric testing, interesting cases in ENT with their operative videos, conferences conducted, outreach activities and academical activities.

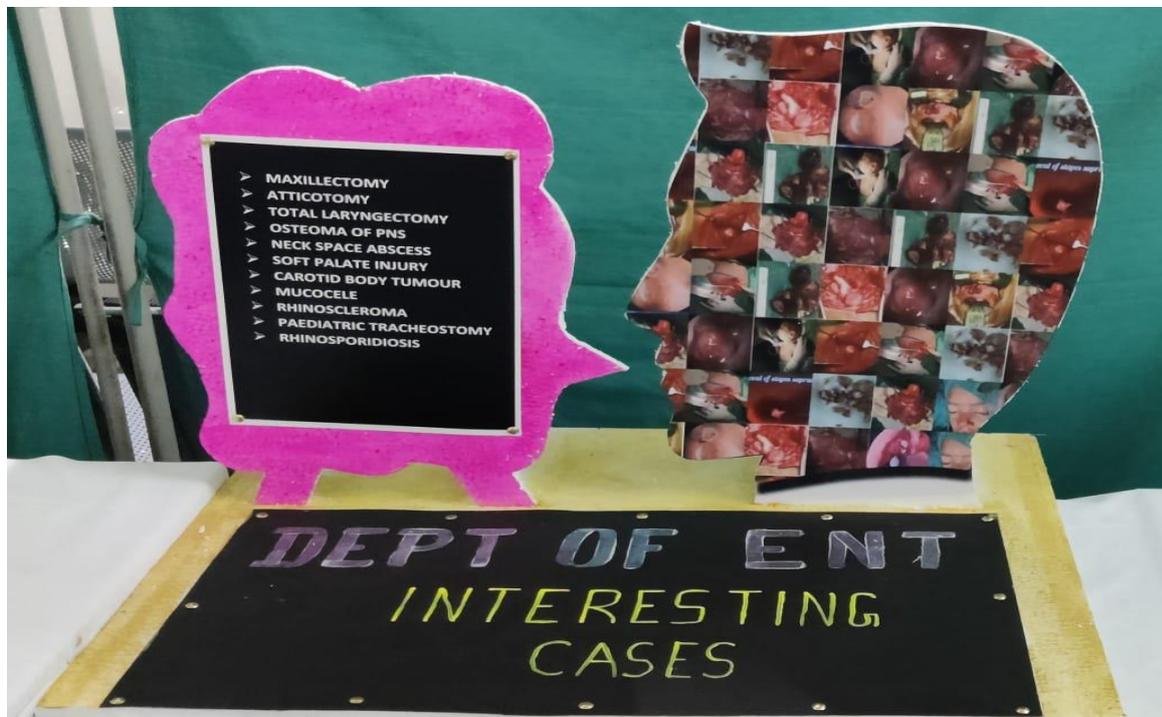

Speciality clinics including Allergy, Headache, Vertigo and Carcinoma clinic were demonstrated in a train model with its statistics.

For detecting the hearing status in neonates, audiometric testing such as Oto Acoustic Emission and Brainstem Evoked Response Audiometry are done and have been shown with its statistic from the year 2016-2021.

All the interesting cases seen and operated were depicted in a head and neck model along with their operated videos.

Pictures of events such as Conferences and Commemorative days conducted by our department were displayed. As a part of academics, videos of innovative teaching including role play, debates were shown. A lot of patients were benefitted from the camps that were conducted and free medication were given and the images were displayed. As we have gone

through the peak era of COVID-19 infection, our department has contributed a major role in collecting samples for COVID-19 RT-PCR and the number of sample collected along with images were displayed in a SARS-CoV-2 virus model.

It was a privilege and an honour to share and exhibit the activities conducted in our department and gives immense pleasure to see all the patients and students benefitting from these activities.
